

Stratum™ X5 - 6GHz

Product Snapshot

The 6 GHz Stratum™ X5 is a high-performance point-to-point wireless radio. The 6 GHz MIMO 4x4 radio enables point-to-point connectivity that offers over 1.5 Gbps throughput, making it perfect for high-capacity backhaul applications.

The 4x4 MIMO radio offers two significant benefits :

- In MIMO 4x4:4 mode, a 20MHz channel will double the throughput compared to the typical MIMO 2x2:2 point-to-point systems available today.
- In MIMO 4x4:2 mode, antenna diversity enables two mirrored data streams that improve radio stability in harsh environments.

Other Features Include :

- Throughput >1.5 Gbps TCP and 1.8 Gbps UDP
- Wide Band Radio - 5.925 - 7.125 GHz
- 2.5 Gbps Ethernet with optional 10 Gbps SFP+ optical transceiver cage
- AES 128-bit encryption is upgradeable to 256-bit
- Full tilt and swivel mounting kit included.

Integrated Antenna and Connectorized Models

The SX5-2042A includes an integrated quad polarity panel antenna.

Model SX5-2040A is a connectorized unit purposed build for external quad polarity antennas where specific antenna patterns or gain adjustments are needed.

Advanced Interference Management

Proxim ClearConnect™ combines multiple dynamic technologies and delivers the best interference management solution.

Secure Management Options

Management options include Proxim BlueConnect™; our Bluetooth-enabled mobile management application; TLS 1.3 web GUI, SSH 2.0 CLI, and SNMP v3 for ProximVision Advanced or other network management solutions.

Rugged Reliability

Stratum X5 uses an IP67-rated metal enclosure to ensure years of reliable service in harsh environments, including high winds, high salt, and temperature extremes.
